## PROFESSIONAL SUMMARY

Full-stack software engineer with 4 years of experience shipping production web and mobile products across logistics, ERP, and AI-driven platforms. Currently owns a transportation platform serving 500+ shippers and carriers end to end — React and Next.js interfaces, NestJS services, MongoDB data layers, and two React Native apps — from schema design through CI/CD and production release. Not bound to a single language or framework; picks the right tool for the problem. Seeking a mid-level SDE role with full ownership of systems that solve real-world problems.

## PROFESSIONAL EXPERIENCE

### Tiso Studios — Hyderabad

April 2025 – Present

#### Software Engineer

- Own a transportation management platform serving 500+ shippers and carriers, supporting 3,000+ trucks and 6,000+ completed trips across one web app and two mobile applications.
- Engineered backend services and complex business logic in NestJS and MongoDB, authoring 10+ database migration scripts that evolved production schemas without data loss.
- Drove end-to-end feature delivery across the multi-app ecosystem, keeping web, backend, and both mobile clients consistent while managing release workflows and production deployments on Vercel.

### DevRelSquad — Hyderabad

September 2024 – February 2025

#### Full Stack Developer

- Led engineering for an AI-driven DevRel product, delivering production-grade features end to end across React, Tailwind CSS, Webpack, Python, and Flask.
- Architected LLM-powered services with LangChain and OpenAI APIs, cutting content production from 8 hours of manual work to under 5 minutes.
- Built CI/CD pipelines with GitHub Actions, reducing deployments from a 30-minute to half-day manual process down to under 5 minutes.

### Doigde Tech Solutions — Hyderabad

January 2024 – July 2024

#### Frontend Engineer

- Designed and launched a drag-and-drop ETL workflow builder in React, React Flow, MUI, and SCSS, letting non-technical users assemble complex pipelines in minutes instead of the hours or days a code-based process demanded.
- Engineered interactive visualization components that made pipeline structure readable at a glance, removing the need for dedicated technical training and process overhead.

### Amoghnya Tech Solutions — Hyderabad

October 2021 – October 2023

#### Full Stack Developer

- Built and scaled full-stack ERP and admin systems with React, Next.js, TypeScript, NestJS, and Redux Toolkit, guarding core business logic with Jest test suites.
- Replaced manual data collection and reporting with embedded, auto-updating dashboards (React, Redux, MUI, ApexCharts), removing recurring weekly reporting work from the team.
- Shipped MERN and React Native applications spanning authentication, role-based admin panels, community engagement, and activity tracking across web and mobile.

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS

**Backend & Data:** Node.js, NestJS, Express.js, REST APIs, MongoDB, PostgreSQL, Prisma

**Mobile & Cloud:** React Native, AWS, Firebase, GitHub Actions (CI/CD)

**Languages:** English, Hindi, Telugu, Marathi

## EDUCATION

### Diploma in Computer Engineering

2018 – 2021

Bhivarabai Sawant College of Engineering & Research, Pune

### Schooling (Grades 1–10)

2008 – 2018

Kendriya Vidyalaya No. 2, AFS Pune 32
